A New eMeeting Option for Virtual Clubs

Is your district launching a new virtual e-Club next year? Exploring another new concept variation on weekly meetings, a Passport club, that only meets in person a few times a year? If so, DACdb added a feature that makes creating these virtual meetings simple and easy **eMeeting**. Pivotal to the functionality of this feature is the club must subscribe to both the Attendance¹ and Website¹ premium modules.

Take your DACdb Registration to the Next Level

Have you struggled with event registration in the past? Organizing rooms, bus schedules or table assignments can be tricky. **DACdb Resource Management** takes your registration one step further to give you a way to keep your rooms, tables and bus assignments (or called **Resources** in DACdb) organized.

No event is too large for the **DACdb Resource Management** module to handle. Drag and drop, sorting and cloning options give you the ability to easily customize these resources and keep them all straight. This is a super powerful tool and works well with large events with hundreds of registrants.
